---

Good Afternoon Ms. Engleman,

It has now been over year since we did the SPCC inspection at your facility. I know you said in your last email that you've hired an engineer to write a plan for you. I'm notifying you that the EPA will give you until **June 30, 2022**, to send a plan. If we don't receive a plan, we will initiate an Expedited Settlement Agreement, which would include a small penalty. Thanks for your attention to this.

Hi Darla I wanted to update you on progress. I have hired Z Engineering out of Clearfield, UT to get the SPCC Plan. He will schedule a time to drive to Green River and I will forward the plan on as soon as I have it.

Thank you,

Diana

The owner/operator is responsible for getting an SPCC Plan, and I believe that is currently you? You asked me in August of 2021 if I could recommend an engineer, and I responded that I can't recommend anyone, but that I could share who others in your area have used, which I did. Have you reached out to anyone?

Good afternoon,

I will check with the previous owners and see why this has not yet been submitted yet. I apologize this should have been completed.

Thank you,

Diana

Good Afternoon Ms. Engleman,

I was wondering if you have had an SPCC plan written for your facility in Green River? A significant amount of time has passed since I've heard anything from you. Please give me an update. Thanks.

Hi Ms. Engleman,

I sent you the information regarding the inspection on July 20th, which includes the date the inspection took place, photos we took, inspection report, etc. Ms. Corrigan was informed at the time of inspection that she was out of compliance with the SPCC regulations, because she didn't have an SPCC Plan at the time of inspection.

I can't recommend an engineer, because we are not allowed to do that. I can give you names other owner/operators of above ground tanks in your area have used. So far, I only know of Environmental Solutions, out of Colorado Springs, so I'm not sure that would help you, but you could give them a call. I included the contact information below for another engineer that someone in your area used. I know another business contacted Terracon, and they said they would be able to write a plan for them, so you could also give them a try, but I don't have contact information for them.

Blaine Zwahlen, PE

Z Engineering & Environmental Services, Inc.

Good afternoon Darla,

I am hoping you can help me get some information on the inspection that was performed here and also assist me in finding an engineer.

I am curious to know when the inspection took place?

When the Corrigan's were notified of the findings of the inspection?

Do you recommend any engineers?

If you don't would you happen to know of any engineers that are willing to come to Green River?

Thank you,

Diana Gingerich
